

# A walk on the wild side

## Nature Day at home

all  
ages

### Stick pots

Make a wonderful, natural looking plant pot to bring nature indoors

You will need:

- twigs
- old plant pots or clean yoghurt pots
- wool / ribbons / braid / string / spare buttons
- elastic bands
- scissors (and a grown up with secateurs)
- PVA glue (thick) Older children could work with an adult with a hot glue gun but this is not recommended for younger children.

Collect your twigs.  
Choose your pot. Make sure it is clean. For your first try choose a small pot.

Cut your twigs to the same height as the pot. If the twigs are thick an adult would need to do this for you with secateurs.  
Put thick PVA glue on your clean pot in small patches at a time.

Carefully arrange the twigs around the pot and hold in place with elastic bands until the glue has dried.

Decorate, if you wish with wool, ribbon, string or braid and buttons.
