

THE IMAGINARIUM

ADVENTURES IN STORYLAND ROCKET BACK PACK

- You will need:
- Two fizzy drink bottles
 - Corrugated card
 - Tape
 - Paint
 - Scissors
 - Paper
 - Ribbons

If your bottles are clear plastic, you might want to paint them but you can make this without paint. Cut a piece of cardboard large enough to stick both the bottles side by side and give a further 4cm of card at each side.

Cut two pieces of ribbon long enough to thread through the card and make loops big enough for the intended wearer to slip the pack on their back like a rucksack.

Using a blunt pencil make holes in the card and thread the ribbon through, then decorate around the edges of the card with your tape. Try the card on the wearer's back and if it fits use the tape to stick the bottles side by side on the card. You can add other buttons or detail using paper and felt pens if you like.

You can add flames to your rocket pack or you may wish to add a pipe of some kind and make oxygen cylinders instead.

Enjoy your rocket back pack or oxygen cylinders!
